Profile

Full-Stack Software Engineer with 5.5 years experience building production systems in the modern JavaScript ecosystem (**Next.js, React, TypeScript, Node.js**). Delivered **20+ applications** across the gaming sector (50k+ users), FinTech and media sector. Led cross-functional teams, modernized legacy systems (70% faster load times) and established code standards across projects. Technical writer (250K+ views) and mentor. Transitioning from project-based work to Full-Time product development.

Technology & Skills

Frontend & App-Layer: TypeScript, React, Next.js, TailwindCSS, Zustand, Zod, SCSS, JavaScript (ES6+), Framer Motion
Backend & Data: Node.js, PostgreSQL, Prisma ORM, Redis, SQL, Server Actions, **REST APIs**, NextAuth.js
DevOps & Testing: Vitest, React Testing Library, Jasmine, **Docker**, Git, GitHub, Vercel, Supabase, Umami Analytics
Tools & Standards: Figma, Notion, WCAG 2.1, Agile/Scrum/Kanban

Work Experience

Full-Stack Software Engineer & Technical Project Lead

08/2022 - Present, Germany

Long-term contract work on 20+ client projects across FinTech, E-Commerce, Gaming and international Media

- Delivered **20+ end-to-end web applications** and updated legacy systems to Next.js (SSG/ISR), reducing load times by up to **60%**.
- Led teams for **3 major projects with teams of 3-5 developers**, establishing feature-first architectures and code review processes to ensure easily scalable and maintainable code.
- Optimized the user experience and overall performance across multiple projects, **increasing traffic by up to 40%**.
- Built robust CI/CD pipelines (Vercel/Netlify/GitHub) and implemented comprehensive type safety (TypeScript/Zod) to automate deployments and to minimize error rates, resulting in **~20% faster deployment times** across projects.

Web Developer & IT-Project Coordinator

08/2020 - 07/2022, North Macedonia & Turkey

Full-time role with international NGOs under senior mentorship, delivering accessible and multilingual web solutions

- Developed accessible websites (WCAG 2.1 compliant), expanding reach and increasing **user engagement by ~30%**.
- Optimized donation forms and landing pages for various NGOs, resulting in **~15% increase in financial support**.
- Coordinated with global stakeholders and implemented **multi-language support (i18n)** for websites.

Selected Client Work

Secure International News-Platform (NDA)

09/2024 - 12/2024, (Remote) Germany

Full-Stack Engineer • Case Study

Tech-Stack: Next.js, React, TypeScript, Tailwind CSS, Zod, NextAuth.js, Redis, Prisma, PostgreSQL, MDX, Hetzner S3

- Rebuilt legacy WordPress news platform as custom Next.js application for politically sensitive journalism environment, achieving 70% performance improvement while implementing pseudonymization for **20+ authors** and offshore EU data hosting.
- Developed **complete admin panel and MDX-based CMS** from scratch (rejecting Strapi/Contentful due to security requirements), enabling rich content creation with dynamic sections, role-based permissions and Hetzner S3 media pipeline.
- Implemented multi-layer **security blocking 99.9% of unauthorized access** (NextAuth.js, Redis rate limiting, CloudFlare) and established ISR strategy with dashboard-controlled cache invalidation for real-time updates without performance degradation.
- Automated WordPress migration: custom pipeline extracted **90+ articles** from MySQL, converted HTML to MDX, migrated media to S3, preserved SEO metadata, reducing 3-week manual estimate to 2-day automated process.
- Developed maintainable codebase as sole developer on **4-month contract**, using feature-first organization and comprehensive documentation for seamless handoff to future developers.

Additional client work under NDA includes high-traffic gaming platform (50K+ users), FinTech applications and E-Commerce systems. Representative work showcased on my Website at: stefan-luellmann.com

Education

Abitur (University-Entrance Diploma) | BBS Stadthagen, Stadthagen | 2020

07/2020, Stadthagen - Germany
